

WHERE THE SHADOW FALLS — TRIANGLE — option C2 (tip at the AC line)

Top views (north up). Red dashed = roof outline; dark = shade on the ground (roof + annex + walls); sun dial top-right of each view shows where the sun is.

21 MAY

sun height 31°, from E (88°)

12:00

sun height 65°, from SE (129°)

15:00

sun height 62°, from SW (237°)

18:00 (evening)

sun height 28°, from W (275°)

21 JUNE

sun height 32°, from E (84°)

sun height 66°, from SE (122°)

sun height 65°, from SW (240°)

sun height 31°, from W (277°)

21 JULY

sun height 30°, from E (86°)

sun height 64°, from SE (125°)

sun height 64°, from SW (234°)

sun height 30°, from W (273°)

21 AUGUST

sun height 25°, from E (94°)

sun height 57°, from SE (137°)

sun height 57°, from SW (224°)

sun height 25°, from W (266°)

HOW TO READ (both versions behave the same way; only the size of the shaded patch changes)
09:00 — sun low in the EAST (25-32°): it shines in under the roof; the roof's shade lands on the annex facade, so the paving under the roof is mostly in sun (only a strip at the facade is shaded).
12:00 — sun high in the SOUTH-EAST (57-66°): the shade lies under the roof, shifted ~1 m towards the annex and the tall wall; the planter strip along the garden wall stays in sun. 15:00 — sun high in the SOUTH-WEST: the shade shifts towards the tall wall and further along the courtyard; the annex shades the door area too.
18:00 — sun low in the WEST: the annex and the tall wall shade almost the whole courtyard; the roof adds little. Triangle C2: 3.06 along the planter, 1.75 at the wall — longer shade along the planter side.
Assumptions: Athens 37.98 N, 21st of each month, summer time (EEST); plan north = up (tall wall north) — if the real orientation differs, the pattern rotates with it. Existing trees not included (they add shade).

COURTYARD ROOF — SHADOW STUDY

Sun & shadow, 21 May - 21 August, Athens 37.98 N; TRIANGLE — option C2 (tip at the AC line); roof supported by the tall wall, no void
Client: Owner / Client
Design & drawings: Claude Code

- DRAWING NOTES**
1. Do not scale from this drawing. Use figured dimensions only.
 2. All dimensions in millimetres; levels in metres relative to internal FFL ± 0.000 (datum to be tied to site survey).
 3. Contractor to verify all dimensions, levels & existing structure on site before fabrication or ordering.
 4. Read with all other architectural, structural & services drawings and the specification notes (A-001).
 5. Structural members are preliminary: final design, connections & calculations by a licensed structural engineer to local code before construction.
 6. Report any discrepancy to the designer before proceeding.
